Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from A Compend of Histology It has been the author s purpose to supply a volume more complete than the existing compends, and yet not so voluminous as a Text-book. An effort has been made to present the matter in a clear and concise manner, and as up-to-date as possible. The subject of Embryology has been touched upon only in so far as it bears directly upon the Histology. The chapter on Technic has been made as complete as is necessary for routine histologic and pathologic work. The Connective Tissues have been grouped in what seems a simple and also characteristic manner. The Blood Cells have also been arranged in a simple and readily-comprehended form. The chapter on Placenta and Umbilical Cord has, however, been written somewhat in detail, as the embryology of these organs is essential for a thorough knowledge of their structure. The illustrations arc from the works of Prof. Minot, to whom the writer is indebted for their use. The forty-seven new cuts were prepared under the direction of Dr. H. H. Cushing. Of these, twenty-seven are from slides, while the remainder represent modifications of current Text-book figures. The writer desires to thank Dr. R. C. Rosenberger for his assistance in proof-reading and suggestions, and the publishers for their many kindnesses and courtesies.
