Current Concepts in Botany

By K.G. Mukerji & C. Manoharachary (Eds)

I.K. International Publishing House Pvt. Ltd, 2006. Hardcover. Book Condition: New. 18 x 25 cm. In the recent years significant number of advances have been made in all aspects of plant sciences and to bring the widely difference aspects under one cover is indeed a Herculean albeit subjective task. That is precisely what the effort of the editors has been in compiling Current Concepts in Botany, which is a collection of review articles as well as original research papers from contemporary fellow botanists from all over the world. This volume contains 31 authoritative and through provoking articles of both applied and fundamentals value written by leading scientists in the area of their specialization. The objective in developing this volume was to offer a detailed overview of the applied aspects of Botany in terms of its theoretical, methodological and empirical contributions. Interdisciplinary aspects of subject have been emphasized in the present volume. Contents: Preservation of Biodiversity of Fungi Herbarium: Specimens and Culture Collection *Trichomycetes: Forgotten Fungi *The Laboulbeniales (Ascomycetes): Distribution and Host Parasite Relationships *Arbuscular Mycorrhizal Fungal Taxonomy *Pathological and Taxonomical Aspects of the Genus Drechslera *Evaluation and Classificatory Systems in Smut Fungi *Pleurotus: A Mushroom of Commerce and Broad Adaptability...

Reviews

An incredibly great book with perfect and lucid answers. Better then never, though i am quite late in start reading this one. You will not sense monotony at whenever you want of the time (that's what catalogues are for relating to if you question me).

This publication may be worth purchasing. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.
